

MONTGOMERY ALPHA PLUS FUND

INVESTMENT REPORT & FACT SHEET

FUND OVERVIEW

The Montgomery Alpha Plus Fund offers investors an Australian equity market neutral strategy that harnesses the benefits of a repeatable investment process while seeking to produce higher risk-adjusted returns over the medium term - irrespective of market conditions.

By simultaneously managing long and short portfolios of similar size, The Fund aims to reduce or eliminate the risks typically associated with extreme market gyrations.

The Fund aims to achieve returns that exceed the RBA cash rate by 6-8 per cent per annum after fees and targets a lower level of volatility than the overall Australian equity market.

Typically The Fund will hold 15-35 long positions and 15-35 short positions of equal value.

FUND COMMENTARY

2016 proved to be a most difficult year for quality-oriented investors. A confluence of factors resulted in an inversion of the expected long-term relationship between quality and investment performance, with the result that many lower-quality businesses performed strongly through the year, while many higher-quality businesses suffered sharp price declines. December saw a continuation of this theme, with the result that the Montgomery Alpha Plus Fund declined by 3.82 per cent for the month.

We remain convinced of the long-term merit of investing in quality businesses, notwithstanding the experience of recent months. While there will certainly be a mix of good and bad times, we believe the investment strategy employed by MAPF should deliver attractive returns for its investors over longer time horizons.

With quality now offering relatively attractive value, we are certainly not about to dilute the quality focus currently built into the portfolio.

TOP COMPLETED HOLDINGS* (LONG)

(at 31 December 2016, out of 26 holdings)
