

MONTGOMERY GLOBAL FUND

INVESTMENT REPORT & FACT SHEET

FUND OVERVIEW

The Montgomery Global Fund employs a highly disciplined, bottom-up, value style and typically invests in 15 to 30 high conviction stocks listed on major global stock exchanges. The focus of The Fund is on investing in what Montgomery Global regards as high quality businesses with attractive prospects trading at a discount to their estimated intrinsic value.

The Fund has the flexibility to retain a reasonable level of cash, with a "soft" 30 per cent limit. The Fund will generally be currency unhedged but we can put in place strategies aimed at protecting investor capital against currency fluctuations if we predict material upside to the Australian dollar.

The Fund aims to deliver superior positive returns when suitable investment opportunities are abundant, and to preserve capital through cash allocations when an insufficient number of company names are appealing.

FUND COMMENTARY

In the month of October, the Montgomery Global Fund declined by 1.18%, net of fees. This compared to the MSCI World Total Return Index (the Benchmark) which declined by 1.38%, in Australian dollar terms. Since inception, The Fund was up 4.32%, net of fees, versus the Benchmark which has gone sideways over the last 16 months, delivering just 0.05%, in Australian dollar terms.

While the airwaves were dominated by all things related to Trump versus Clinton, we were focused on the release of third quarter earnings which got underway in October. Thus far, the portfolio has held up reasonably well with solid results coming in for a number of our technology platforms, including Take-Two Interactive (NASDAQ: TTWO), Microsoft (NASDAQ: MSFT), Alibaba (NYSE: BABA) and Apple (NASDAQ: AAPL).

Offsetting these positive developments somewhat, was some softening in the growth observed in Essilor International (Euronext: EI), CVS Health (NYSE: CVS) and Insperty (NYSE: NSP). Despite the slight weakness these businesses are experiencing today, we remain convinced of their quality and attractive future prospects. And today, we can add to our positions at even lower prices than we could in the past.

We exit the month with 18.1% of the portfolio held in cash. This provides us with ample firepower to capture new opportunities as and when they present themselves – particularly in light of some of the globally significant events which are taking place over the concluding two months of this calendar year.
