

INVESTMENT REPORT & FACT SHEET

FUND OVERVIEW

The Montaka Global Long Only Fund (the Fund), previously known as Montgomery Global Fund, employs a highly disciplined, bottom-up, value style and typically invests in 15 to 30 high conviction stocks listed on major global stock exchanges. The focus of The Fund is on investing in what Montaka regards as high quality businesses with attractive prospects trading at a discount to their estimated intrinsic value.

The Fund has the flexibility to retain a reasonable level of cash, with a “soft” 30 percent limit. The Fund will generally be currency unhedged but we can put in place strategies aimed at protecting investor capital against currency fluctuations if we predict material upside to the Australian dollar.

The Fund aims to deliver superior positive returns when suitable investment opportunities are abundant, and to preserve capital through cash allocations when an insufficient number of company names are appealing.

Montaka Global Long Only Fund

JULY 2021

In the month of July, the Montaka Global Long Only Fund (the Fund), increased by 2.62 percent, net of fees. Over the same period, the MSCI World Total Return Index in Australian dollar terms (the Benchmark) increased by 3.97 percent. Since inception, the Fund has increased by 85.98% percent, net of fees, delivered with an average cash holding of 15.6 percent. Over the same period, the Benchmark has increased by 104.68 percent.

Last month, several of Montaka's investee companies reported their second quarter results, including Blackstone, The Carlyle Group, UnitedHealth Group, Visa, S&P Global, Facebook, Spotify, Microsoft, Amazon and Alphabet. Across the board, we continue to be very pleased with the progress we are seeing. We say 'progress' because, despite having already achieved great market positions, Montaka's investee companies are all pursuing new and meaningful avenues of growth.

Blackstone, the world's largest alternative asset manager at US\$684 billion in AUM, is particularly noteworthy in this regard. It is quite astonishing that, in spite of its enormous current size, the business has multiple avenues of meaningful incremental growth into very large addressable markets. Here's how Chairman and CEO, Steve Schwarzman, characterised the quarter:

"The second quarter in my view was the most consequential in our history... in terms of setting the foundation for the firm's long-term growth trajectory. We're seeing significant momentum with our expansion into the retail and insurance channels... These channels represent fast new markets for Blackstone and a new paradigm for growth at the firm."

Montaka believes these growth options are not being fully appreciated by the market today and, therefore, the business remains materially undervalued.
