

MONTGOMERY GLOBAL FUND

INVESTMENT REPORT & FACT SHEET

FUND OVERVIEW

The Montgomery Global Fund employs a highly disciplined, bottom-up, value style and typically invests in 15 to 30 high conviction stocks listed on major global stock exchanges. The focus of The Fund is on investing in what Montgomery Global regards as high quality businesses with attractive prospects trading at a discount to their estimated intrinsic value.

The Fund has the flexibility to retain a reasonable level of cash, with a "soft" 30 per cent limit. The Fund will generally be currency unhedged but we can put in place strategies aimed at protecting investor capital against currency fluctuations if we predict material upside to the Australian dollar.

The Fund aims to deliver superior positive returns when suitable investment opportunities are abundant, and to preserve capital through cash allocations when an insufficient number of company names are appealing.

FUND COMMENTARY

In the month of September, the Montgomery Global Fund (the Fund) declined by 1.93 per cent, net of fees. This compared unfavourably to the MSCI World Net Total Return Index in Australian dollar terms (the Benchmark) which increased by 0.51 per cent over the same period.

Since inception, the Fund is up by 48.27 per cent, net of fees, versus the Benchmark which is up by 41.04 per cent over the same period. Importantly, the Fund has achieved these results despite holding an average of approximately 20 per cent of the portfolio in cash.

The month rounded out a very challenging quarter that was characterised by a strong rotation out of Asian and European equities, into US equities.

The underlying drivers of the rotation appeared to be related to President Trump's escalating trade measures and the strengthening US dollar. Dealing with this rotation has been difficult because much of the selling and buying has been indiscriminate and not based on fundamentals, in our view.

We believe there is a material probability that President Trump's aggressive protectionist actions towards China will persist for months and possibly years. On this basis, we took the decisive action to reduce the Fund's Chinese exposure. As and when clarity is gained over the resolution of this trade dispute, we will look to add back this exposure expeditiously.
