

MONTGOMERY GLOBAL FUND

INVESTMENT REPORT & FACT SHEET

FUND OVERVIEW

The Montgomery Global Fund employs a highly disciplined, bottom-up, value style and typically invests in 15 to 30 high conviction stocks listed on major global stock exchanges. The focus of The Fund is on investing in what Montgomery Global regards as high quality businesses with attractive prospects trading at a discount to their estimated intrinsic value.

The Fund has the flexibility to retain a reasonable level of cash, with a "soft" 30 per cent limit. The Fund will generally be currency unhedged but we can put in place strategies aimed at protecting investor capital against currency fluctuations if we predict material upside to the Australian dollar.

The Fund aims to deliver superior positive returns when suitable investment opportunities are abundant, and to preserve capital through cash allocations when an insufficient number of company names are appealing.

FUND COMMENTARY

In the month of March, the Montgomery Global Fund (the Fund) returned 1.46 per cent, net of fees. This was in line with the MSCI World Total Return Index in Australian dollar terms (the Benchmark), which returned 1.47 per cent over the same period.

This brings the Fund's return for the first calendar quarter to 13.97 per cent, net of fees, despite holding an average of 10.9 per cent of the Fund in cash which acts as a drag in a strong equity market. By comparison, the Benchmark delivered 11.47 per cent in the first calendar quarter.

Since inception, the Fund has delivered 50.75 per cent, net of fees, despite holding an average of 18.9 per cent of the Fund in cash. By comparison, the Benchmark – which carries zero cash – delivered 39.91 per cent over the same period.

Strong performances were delivered by a number of our high-quality global technology platform businesses, in the month of March. Businesses like Apple (NASDAQ: AAPL), Tencent (HKEx: 700) and Microsoft (NASDAQ: MSFT) performed particularly well.

Global leader in seating and electric systems for autos, Lear (NYSE: LEA), underperformed in March. We believe this high-quality business remains materially undervalued and, therefore, took the opportunity to add to our position.

We continue to remain significantly less bearish than many of our peers in the marketplace today. And we could not be more excited by the opportunities we currently hold in the Fund's portfolio.
