The Investment Manager Elvest Co

Elvest Co is a boutique investment manager specialising in small and mid cap Australian equities. The Elvest Co name represents the focus of the company, as an abbreviation of Emerging Leaders Investment Company. We established Elvest Co with the goal of delivering strong absolute and relative returns to investors.

We believe the small and mid cap market offers investors the best opportunity to compound wealth over the long term. Therefore, Elvest Co will seek to develop and manage products that invest in a range of high quality, undervalued small and mid caps with significant long term growth potential.

Elvest Co is independently owned and operated by managers with a track record of outperformance. The Fund invests in 20 to 40 small and mid cap securities listed on the Australian Securities Exchange (**ASX**). The Investment Manager invests on behalf of wholesale and sophisticated individuals, financial planning groups and family offices. Elvest Co principals have committed to invest a significant portion of their money into the Fund.

Investment Opportunity

The Investment Objective of the Fund

The objective of the Fund is to provide strong absolute returns to investors, while also outperforming its S&P/ASX Small Ordinaries Accumulation Index benchmark over rolling 5-year periods. The Fund will typically invest in between 20 and 40 small and mid cap companies, while up to 10% of the portfolio may be invested in unlisted securities.

We seek to exploit market inefficiencies typically more prevalent outside the S&P/ASX100 Index. Elvest Co believes that attractive long-term returns can be achieved through the implementation of a disciplined investment process, using bottom-up fundamental analysis and with a focus on high quality emerging leaders. Our four-step investment process is summarised below.

Investment Process

- **Screen: Total universe (2200 companies)**
Screen out mature S&P/ASX100 non-growth constituents, nano-caps, unsustainable & speculative companies.
- **Review: Investible universe (500 companies)**
Proprietary review of business model, industry position, management, and financial metrics.
- **Analyse: Long List (75 companies)**
Deeper review of companies that meet most or all desired investment criteria.
- **Due Diligence: Short List (up to 25 companies)**
Conduct detailed due diligence on 10 to 25 companies, including final investment reports and financial modelling.

Portfolio Construction

The Fund will typically hold between 20 and 40 securities. Portfolio weightings will typically range from 1% to 8% with the average cash position over the longer term expected to be no more than 20%. No individual position will be more than 10% of the Net Asset Value of the Fund (at cost). Risk will be managed via diligent execution of a process focused on high quality companies and sensible portfolio diversification. We retain flexibility to hold elevated levels of cash during extreme events (cash range of 0% to 30%). Portfolio liquidity will be monitored and measured on a regular basis. Derivatives, short selling, and gearing will not be used by the Investment Manager.

The Investment Strategy of the Fund

Elvest Co's focus is small cap investing. Under-researched and under-owned by large institutions, the small cap market provides opportunities to generate strong absolute returns over the long term. Our bottom-up research and company visitation program results in an actively managed portfolio of 20 to 40 high-quality Australian businesses offering dynamic growth.

We target companies that have:

- **Emerging industry leadership:** Companies with industry leading products and services often build a durable economic moat that, in time, is reflected in superior profitability.
- **Strong balance sheet:** Well-funded companies have more flexibility to invest in their growth objectives, while also having a degree of protection against setbacks.
- **Cash generation:** Highly cash generative companies can reinvest consistently, supporting higher per share value creation.
- **Aligned management:** With an emphasis on owner managers and founders, we invest alongside trustworthy managers that are focused on the company.
- **Large opportunity sets:** High quality emerging companies often grow into large market opportunities, delivering compounding returns over longer periods.

Within our investment universe, market pricing is at its most inefficient, and we occasionally see obvious departures from underlying value. By owning companies at a discount to our assessed value, we increase the probability of a successful investment outcome.

Limited Capacity Offering

It is difficult to sustain high returns with very large pools of capital in the small and mid cap market segment. At a certain scale, size limits an investment manager's ability to deliver above-average returns. We will restrict the Fund's capacity, with preservation of long-term performance potential as the primary motivation.

What are the Features & Benefits of the Fund?

Fundamental approach with a focus on quality

The Elvest Co process distills an investment universe of over 2000 companies into a high conviction portfolio of 20 to 40 stocks. Our fundamental bottom-up research and company visitation program results in an actively managed portfolio of high-quality Australian businesses offering dynamic growth. Our process incorporates the Elvest Co quantitative quality filter, which is combined with detailed qualitative analysis. This goes beyond the ordinary to gain unique insights that can drive superior long-term performance.

We are nimble and operate in a structurally inefficient market segment

The small and mid cap market has limited research coverage and institutional participation, providing fertile grounds for stock picking. As a specialised boutique, Elvest Co can invest in dynamic, high-quality companies without moving markets. There is no 'institutional imperative' at Elvest Co, and we will strictly limit Fund capacity to preserve performance.

Diversification

The ASX is dominated by large cap financial and resource companies, with the S&P/ASX20 representing greater than 50% of the Australian market, when measured by market capitalisation. The Fund provides investors with more diverse exposure to a greater range of Australian companies, encompassing various high-growth sectors.

Alignment

As principals of Elvest Co, we have committed to invest a significant portion of our wealth into the Fund. We are fully aligned with our investors and will manage capacity to ensure performance remains the priority. Further, key investment staff share in the performance fees generated by the firm via a relative performance-linked bonus structure. The benefit of Investment Manager ownership, fund investment, and a performance-linked bonus structure is total alignment of the investment team's interests and those of investors.

Elvest Co and its investment team share in both the upside and downside, as well as having incentives that reward superior absolute and relative investment performance.

Small and mid cap specialists

Backed by a proven process and with a track record of outperformance, our focus is small and mid cap investing. Under-researched and under-owned by large institutions, this market segment provides opportunities to generate above-market returns over the long term.

Corporate governance

Under the Australian Corporations Act and the Fund documents, investors are provided with several layers of independent oversight providing a robust and appropriate corporate governance structure. The structure provides additional investor safeguards through the separation of duties, specialisation of expertise, clear lines of responsibility and layered approval processes.

The Fund is operated and administered by a trustee (**Fundhost**) that holds an appropriate AFSL. Fundhost has appointed an independent custodian to hold the assets of the Fund. Fundhost has appointed Elvest Co as the investment manager of the Fund.

Distributions

You have the right to receive any distributions made from the Fund (usually shortly after the end of June each year). Distributions may include taxable capital gains although they may also carry imputation and other tax credits. You should consult your tax adviser for any tax related enquiries.

Distributions can be reinvested in the Fund or credited to your nominated account. Distributions are automatically reinvested in the Fund unless you tell us not to do this (see the application form or contact us anytime).

Portfolio guidelines

Elvest Co will seek to manage the Fund's investments within certain portfolio guidelines. These are described in this section.

GUIDELINES	AS A % OF PORTFOLIO VALUE	
	Min	Max
Cash (or cash equivalents)	0%	30%
Securities	70%	100%
Unlisted securities	0%	10%
Number of positions (typically but not always)	20	40

Maximum weightings for unlisted securities are monitored at the time of acquisition. So for example the Fund would not generally acquire more unlisted securities if the effect of doing so would be that holdings in unlisted securities exceeded 10% of the portfolio. However, if the unlisted holdings increased in value over time so that they comprised more than 10% of the portfolio, Elvest Co would not be obliged to sell securities to bring the holdings below this level.

Maximum cash holdings are expected to be 30%, but could be higher in some situations such as at commencement of the Fund when it is building out its portfolio, or at times when the Fund is experiencing high inflows of investor money, or when the Fund has sold several investments and is receiving the proceeds, or in extreme market conditions.

Risks

About risk and return

All investments are subject to varying risks and the value of an investment can decrease as well as increase (i.e. you can experience investment losses or investment gains). Changes in value can be significant and they can happen quickly. Investments within categories can have varying performance results. These results are dictated by the individual risk characteristics of the investment, timing and market volatility.

The significant risks for the Fund are discussed below. Not all risks can be eliminated and the risk management strategies that are adopted may not always be successful. However, the Elvest Co investment team follows an investment process whereby risks are considered as an integral part of the investment process.

If these risks occur, distributions may be reduced or there may be none, the value of your investment could fall and you could lose money.

Concentration risk

The Fund will seek to hold a concentrated portfolio of investments. For example, at times it may hold only a few investments, with the rest of the Fund being held in cash. The value of the Fund's investments may be more affected by any single adverse event than the investments of a more diversified portfolio.

Elvest Co will seek to minimise the risks of holding a concentrated portfolio by employing careful investment selection.

Cyber risk

There is a risk of fraud, data loss, business disruption or damage to the information of the Fund or to investors' personal information as a result of a threat or failure to protect the information or or personal data stored within our IT systems and networks and those of our service providers. Both Fundhost and Elvest Co seek to minimise cyber risk by having appropriate systems in place consistent with industry standards and updated regularly.

Fund risk

Risks particular to the Fund include that it could terminate (i.e. if its costs of operating become unreasonable), the fees and expenses could change (see the section entitled [Can the fees change?](#)), Elvest Co could be replaced or the Fund terminated, Fundhost could be replaced as trustee and its or Elvest Co's management and staff could change.

There is also a risk that investing in the Fund may give different results than investing individually because of income or capital gains accrued in the Fund and the consequences of investment and withdrawal by other investors.

Individual investment risk

The Fund is exposed to the risk that poor stock selection occurs whereby individual investments selected by the Investment Manager for inclusion in the Fund either underperform the market or perform poorly in an absolute sense. This risk is magnified by the degree of concentration inherent in this portfolio.

The Investment Manager's bottom-up focus results in a portfolio that looks quite different from most equity indices. Together with the concentrated nature of the portfolio means the Fund is at risk of underperforming the broader equity market, in addition to carrying the risk of poor or negative absolute returns.

These risks are managed as far as is practicable by Elvest Co through the Fund's portfolio management guidelines. These ensure a basic degree of diversification (notwithstanding an inherently high-concentration investment approach) as well as adherence to its well-considered and time-tested core investment philosophy and process.

Investment Manager risk

It is possible that Elvest Co could be wound up or liquidated, it might cease to manage the investments of the Fund and be replaced, its investment methodology could change or it could manage risks poorly.

If the investment strategy of this Fund changed significantly, you would be given at least 30 days' notice (where practicable).

Fundhost has the power to terminate and replace Elvest Co as the Investment Manager, or to terminate the Fund in the interests of unitholders.

Key person risk

The investment management professionals at Elvest Co are responsible for managing the Fund and their personal circumstances can change.

The potential for any key investment staff to depart in the future poses a risk to the investment outcomes for the Fund. This risk is mitigated by the investment management professionals' ownership stake in Elvest Co, and the opportunity for them to share in any performance fees earned by Elvest Co.

Liquidity risk

There are circumstances under which access to your money may be delayed – refer to [Accessing your investment](#).

Further, the level of overall market liquidity is an important factor that may contribute to the profitability of the Fund and access to your money. Illiquid markets can make it difficult to trade profitably and to realise assets in a timely fashion to meet withdrawal requests. Unlisted shares can comprise up to 10% of the portfolio and are generally illiquid.

Please refer to [Accessing your investment](#).

The investments the Fund will invest in may also face liquidity risk themselves.

Units in the Fund are not quoted on any stock exchange and you cannot sell them through a stockbroker.

Market risk

Economic, technological, climate, political or legal conditions, health conditions such as pandemics, interest rates and even market sentiment can (and do) change over time and this can lead to changes in the value of investment markets. While the Fund's exposure will be differentiated from the broad sharemarket indices and may perform very differently from the market at any particular point in time, because it will hold mostly listed securities, the Fund will carry market risk exposure and may decline more or less in line with the market during market downturns. As these conditions change through time, they can cause unanticipated changes to the value of the investments in the Fund.

Micro caps risk

In addition to general liquidity risks as outlined above, Elvest Co has sought opportunity in the micro and small capitalisation segments of the market. Its principal focus is on small cap companies outside the ASX 100 at the time of inclusion in the Fund. Micro cap companies can often be particularly illiquid, and the liquidity profile of investments across the portfolio may be strongly correlated such that market dislocations or an abrupt change in market sentiment can adversely affect both the value and the liquidity of large portions of the portfolio at the same time therefore posing additional risks to the Fund.

This risk is mitigated by ensuring there is a basic degree of liquidity inherent within the portfolio, and that there is basic diversification not only of the economic types of securities, but also their perceived liquidity profile. Ultimately, an investment in the Fund should be considered a long-term investment and investors should be prepared to accept a greater degree of valuation volatility and a reduction in the liquidity profile as the Fund seeks to benefit from mispricing among smaller and less liquid securities.

Unlisted securities risk

While the Investment Manager is not explicitly focused on identifying unlisted securities, it may invest in unlisted securities that are identified incidentally to its core investment process. Examples include, but are not limited to, where the opportunity arises to invest in an unlisted security (such as a convertible note) offered by an existing portfolio holding, or where a company becomes delisted.

This risk is mitigated through the relatively small maximum allocation to these types of securities (10% at cost) within the Fund.

Fees and Costs

Management fees and costs

The Fund will pay Fundhost a fee equivalent to 0.15% per annum of portfolio value. This fee will be accrued and paid monthly in arrears. The Fund will pay the Investment Manager a fee equivalent to 1.28% per annum of portfolio value. This fee will be accrued and paid monthly in arrears. The Trust Deed of the Fund provides that expenses incurred in relation to the proper performance of Fundhost's duties as trustee are payable or reimbursable out of the assets of the Fund. These expenses include, but are not limited to, audit and legal fees.

Fee cap

Management fees and costs payable by the Fund (other than performance fees, abnormal costs and transaction costs) are capped at 1.45% p.a.

Abnormal costs

Fundhost and Elvest Co may incur non-recurrent expenses on behalf of the Fund. These expenses may include, but are not limited to, litigation, legal and other expert's fees, travel and accommodation costs, and other expenses arising from managing the Fund. Fundhost may charge additional fees for its own time spent on such matters.

These are deducted from the assets of the Fund as and when they are incurred. These are not included in the recurrent recoverable expense estimate or the fee cap. Abnormal expenses are expected to occur infrequently.

Performance fee

Elvest Co is entitled to a performance fee of 20.50% of the amount by which the Fund (after fees and expenses but before distributions) outperforms its benchmark over a calculation period. The benchmark for the purpose of calculating the performance distribution is the S&P/ASX Small Ordinaries Total Return Index.

The performance fee is payable half-yearly as at 30 June and 31 December and is subject to a high water mark.

The high water mark means the highest unit price at the end of a performance period where a performance fee has been paid, adjusted for subsequent distributions.

Transaction costs

Transaction costs include brokerage, settlement costs, clearing costs and stamp duty costs. The Fund will incur and pay transaction costs when buying or selling investments. Some of these costs are recovered through the buy-sell spread (see below).

Can the fees change?

Yes, all fees can change. The Trust Deed for the Fund sets the maximum amount that can be charged in fees. The approval of investors is needed in order to raise fees above the amounts allowed for in the Trust Deed.

You will receive at least 30 days' written notice of any proposed increase to fees charged under this IM.

Buy-sell spread

When you invest in the Fund, the Fund buys investments, and this incurs costs (for example, to buy shares, a broker charges a fee). When you withdraw, investments are sold so cash can be paid to you, and this costs money too. This is called a buy-sell spread. A buy-sell spread is an adjustment to the unit price reflecting Fundhost's estimate of the transaction costs that may be incurred as a result of the purchase/sale of assets arising from the issue/withdrawal of units. This adjustment ensures that existing investors do not pay costs associated with other investors acquiring/withdrawing units in the Fund. The buy-sell spread is reflected in the buy and sell unit prices.

Currently, the buy-sell spread is estimated to be 0.50% of the unit price (that is an adjustment of +0.25% on the entry price and -0.25% on the exit price is made). So if the net asset value of each unit is \$1.00, on entry the unit price is adjusted up approximately 0.25% (up 0.25 cents) and on exit down approximately 0.25% (down 0.25 cents). None of this amount is paid to Fundhost nor is money deducted from your account. You won't see the buy-sell spread on any account statement.

Can fees be different for different investors?

We may negotiate fees with very large investors. The terms of these arrangements are at the discretion of Fundhost on advice from Elvest Co. Any fee rebates paid to investors are a cost to Elvest Co and not to the Fund.

Government charges and taxation

Taxes such as GST will be applied to your account if required by law. In addition to the fees and costs described in this section, standard government fees, duties and bank charges may also apply. Some of these charges may incur additional GST and will apply to your investments and withdrawals as appropriate.

The fees outlined in this document take into account applicable GST and any reduced input tax credits which may be available.

Anti-Money Laundering and Counter-Terrorism Financing

In order to meet Fundhost's obligations under the AML CTF Act or other applicable taxation or reporting legislation (including the Foreign Account Tax Compliance Act and Common Reporting Standards legislation), Fundhost may require further information from you as to identity, the source of your funds and similar matters. Fundhost may be required to verify that information by sighting appropriate documentation. Records of the information obtained will be kept and may be required by law to be disclosed. Otherwise the information will be kept confidential.

By applying for units in the Fund, you also agree that Fundhost may in its absolute discretion determine not to issue units to you, may cancel units which have been issued to you or may redeem any units issued to you if Fundhost believe such action to be necessary or desirable in light of its obligations under the AML CTF Act or other legislation and Fundhost will not be liable to you for any resulting loss.

Accessing your investment

Generally, you may access your investment monthly. You must provide your written notice of withdrawal to us by mail, email or fax. See [Applications and withdrawals processing](#) for details of cutoff times.

Despite being able to redeem your units monthly, an investment in the Fund should be viewed as a medium to long term investment.

How to withdraw

Units in the Fund are not listed on any stock exchange like the ASX, so you cannot sell your units through a stockbroker.

If you want to withdraw your money, simply contact us in writing and tell us how much you need to withdraw. This is called a redemption request.

Fundhost accepts scanned or faxed redemption requests on the following conditions:

- all instructions must be legible;
- instructions must bear your investor number and signature; and
- redemption proceeds will only be transferred to the financial institution account previously nominated on the application form or otherwise notified to Fundhost in writing (Fundhost needs an original signed by the account signatories to effect such a change).

To use this service, you will need to accept full responsibility (to the extent permitted by law) for loss arising from Fundhost acting upon faxed or scanned instructions which comply with these security processes and you also agree to release and indemnify Fundhost in respect of any liabilities arising from it acting on faxed or scanned instructions (including future instructions), even if those instructions are not genuine. Also you agree that neither you nor any other person has any claim against Fundhost in relation to a payment made or action taken under the facsimile or scanned instruction service if the payment is made in accordance with these conditions. These terms and conditions are additional to any other requirements for giving redemption instructions.

The amount of money you receive is determined by the unit price applicable to your redemption request. Fundhost can withhold from amounts it pays you any amount you owe Fundhost or Fundhost owes someone else relating to you (for example, the tax office).

Fundhost generally pays all redemption proceeds in cash, but Fundhost is permitted under the trust deed for the Fund to pay proceeds in kind (i.e. in specie share transfer).

Payments can be delayed

In certain circumstances Fundhost may need to delay withdrawal of your money. Fundhost can delay withdrawal of your money for up to 180 days or such period as Fundhost considers appropriate including circumstances where:

- something outside Fundhost's control affects its ability to properly or fairly calculate the unit price (for example, if the investments are subject to restrictions or if there is material market uncertainty like a stock market crash);
- Fundhost receives a quantity of withdrawal requests representing more than 20% of the value of the investments of the Fund. In this case Fundhost can stagger withdrawal payments; or
- Fundhost otherwise determines in its absolute discretion (but it must always act in the best interests of investors as a whole when deciding to do this).

The Trust Deed sets out the full range of circumstances in which Fundhost can delay withdrawal of your money.

We can give you back your invested money without you asking

In certain circumstances Fundhost can, or may be required to, also redeem some or all of your units without you asking. These circumstances include:

- if you breach your obligations to Fundhost (for example, you provide misleading information in your application form);
- to satisfy any amount of money due to Fundhost (as trustee or in any other capacity relevant to the Fund) by you;
- to satisfy any amount of money Fundhost (as trustee or in any other capacity relevant to the Fund) owes someone else relating to you (for example, to the tax office);
- where Fundhost suspects that law prohibits you from legally being an investor; or

- such other circumstance as Fundhost determines in its absolute discretion (but Fundhost must always act in the best interests of investors as a whole when deciding to do this).

The Trust Deed sets out the full range of circumstances in which Fundhost can give you back your invested money without you asking.

How Fundhost calculates unit prices

Fundhost calculates unit prices in three steps:

- it calculates the value of the investments of the Fund and take away the value of the liabilities as defined in the Fund's Trust Deed;
- it divides this result by the number of units on issue to obtain the unit mid-price;
- it then makes an adjustment (up for the entry price, to take account of the costs of buying investments or down for the exit price to take account of the costs of realising investments) called a buy-sell spread. The buy-sell spread does not represent a fee to Fundhost or Elvest Co and is discussed in more detail in the section "[Buy-sell spread](#)".

These steps give a price per unit.

Fundhost determines the market value of the Fund at least each month end based on the closing market prices for the last business day of that month.

Distributions

The Fund generally distributes net realised gains and income annually as at 30th June. Income distributions are usually reinvested at the end of each financial year (June), but you can tell Fundhost if you do not want to automatically reinvest distributions or advise Fundhost in writing anytime if you would like Fundhost to pay them to your nominated Bank Account. Any distributions reinvested are reinvested at the ex-distribution mid price.

Distributions may also be paid at other times, or in some years, not paid at all.

Reporting

Keeping you informed

Fundhost will:

- confirm every transaction you make;
- soon after June each year send you a report to help you with your tax return;
- each year (around September) make the accounts of the Fund available to you on our website;
- send you your annual statement;
- notify you of any material changes to this IM and any other significant event as required by law; and
- send you a monthly investment report each month.

What about Fund performance?

If you are interested in:

- up to date Fund performance; or
- current unit prices

then ask your financial adviser, call Fundhost on +61 (0)2 8223 5400, or go to www.fundhost.com.au

Up to date information is always free of charge. Don't forget that any past returns are just that, just because they happened doesn't mean they will happen again. Returns are volatile and may go up and down significantly and sometimes quickly.

Taxation

Your tax liability ultimately depends on your circumstances, for example, whether you are an Australian resident. So it's important that you seek professional advice before you invest or deal with your investment.

In all likelihood you will need to pay tax in relation to your investment in this Fund. Generally you will pay income or capital gains tax, but you might be able to claim some tax credits or have the benefit of some concessions.

Fundhost will send you the information you need each year to help you to complete your tax return.

Fundhost will generally distribute any income and realised gains, if any, annually. Distributions could comprise:

- income (like dividends and interest); and
- net taxable capital gains (from the sale of the Fund's investments); and
- tax credits (like franking credits attached to dividend income and credits for tax paid on foreign income).

Fundhost may also pay interim distributions.

Additionally, Australian residents are generally subject to capital gains tax on gains when they withdraw any money or transfer units.

Depending on the kind of taxpayer you are, and how long you have held your units, you may be entitled to a capital gains concession which can reduce the liability by up to one half.

If you choose not to provide Fundhost with your tax file number (**TFN**) or Australian business number (**ABN**) and don't have an exemption, Fundhost must deduct tax at the highest personal rate, plus the Medicare levy, before passing on any distribution to you. The law is very strict on how Fundhost can use these details.

You should seek your own tax advice to ensure the Fund is appropriate for you. Neither Fundhost nor Elvest Co provide any tax advice.

A taxation regime for managed investment trusts has been introduced called the Attribution Managed Investment Trust (**AMIT**) regime. Subject to the Fund being eligible, Fundhost can elect to operate the Fund under this regime. As an AMIT the Fund can attribute amounts of income and tax offsets to investors on a fair and reasonable basis. There is also an ability to adjust the cost base of an investor's interest in a Fund upwards or downwards. Should Fundhost make this election investors will be advised on our website.

How the Fund Works

Fund structure

When you invest in the Fund your money (together with all other investors' monies) is gathered in one place and invested in assets. Fundhost has appointed Elvest Co to manage the Fund. Elvest Co uses its resources, experience and expertise to make the investment decisions.

Fundhost has appointed an independent custodian to hold the assets of the Fund.

Units

The Fund is a unit trust. This means your interests in the Fund are represented by units. Certain rights (such as the right to any income and a right to vote) attach to your units. You may also have obligations in respect of your units.

Each unit has a value which Fundhost calculates. When you invest, Fundhost issues you a number of units depending on the amount you invest. Similarly, when you withdraw from the Fund, Fundhost calculates your withdrawal proceeds by reference to the number and value of units you hold at the time of withdrawal. Generally, the price of units will vary as the market value of assets in the Fund rises or falls.

Summary of the Trust Deed

The Fund is governed by a Trust Deed dated 9 March 2022, as amended. The Trust Deed sets out Fundhost's obligations as well as the rights of investors. Key aspects of the Trust Deed have been summarised in this section.

Fundhost may alter the Trust Deed.

You may view a copy of the Trust Deed at Fundhost's offices on any business day and you may obtain a copy free of charge by contacting Fundhost.

Classes of units

Under the Trust Deed for the Fund, Fundhost may issue units in one or more classes and may create additional classes of units at any time.

Rights of investors

Subject to the Trust Deed of the Fund, investors are generally entitled to:

- receive a share of the Fund's distributable income;
- request a redemption of units;
- transfer units; and
- inspect the Trust Deed.

Unitholder meetings

Subject to the Trust Deed of the Fund, investors are also entitled to requisition, attend and vote at investors' meetings for the Fund. An investor is bound by a resolution of investors, whether or not they attend the meeting at which it is passed.

Interest in the Fund

Each unit issued in the Fund entitles the investor to a beneficial interest in the total investments of the Fund but does not give the investor an interest in any particular part of the Fund.

Unitholder liability

The Trust Deed limits an investor's liability in relation to the Fund to the amount the investor has invested, however the law in relation to investor liability has not yet been settled. Under the Trust Deed Fundhost can recover from you any taxes or other amounts that the Fund is required to pay because you hold units or because of any action you have taken or failed to take, either by deduction from amounts payable to you or by redemption of some of your units.

Termination of the Fund

Fundhost can terminate the Fund at any time at its discretion or when required by law. If the Fund is terminated, Fundhost must generally convert the Fund's assets to cash and pay off the Fund's liabilities (including those incurred in winding up the Fund and any unpaid fees including performance fees).

Investors are then entitled to a share of the balance of the assets in accordance with the Trust Deed. This will be the final distribution of the Fund. The final distribution may include both a capital and income component.

Related Party Transactions and Conflicts of Interest

Fundhost does not engage in any related party transactions with any person. All dealings with other parties are at commercial, arms' length terms.

Fundhost has a conflicts of interest policy and register which it maintains in accordance with the law. It seeks to address any conflicts that may arise as part of Fundhost's business and that relate to the Fund.

Elvest Co is or may become the Investment Manager for other funds that invest in many of the same assets as this Fund.

Elvest Co endeavours to ensure that all portfolios are treated fairly by ensuring that, where appropriate, trades in the assets are undertaken as block trades and allocated pro rata according to the size of each portfolio.
